

What is *Denplan Care*?

Denplan Care is an affordable monthly payment scheme which allows you to budget for your routine dental care and treatment. It pays for inspections, x-rays, hygienist visits, preventive dental advice, gum treatment, fillings and root canal treatment. Crowns, bridges and dentures are included (apart from the laboratory fee). The only other things not covered are prescriptions, referral to specialist or specialist treatments, orthodontics, implants or cosmetic treatments.

As a part of your dental plan, Denplan arranges Supplementary Insurance for you. This policy provides you with cover towards the cost of eligible dental treatment received as a result of dental injuries and emergencies in the UK or abroad.

Over 6,500 dentists in the UK look after 1.8 million patients under Denplan Care. The main emphasis of Denplan Care is on providing quality, preventive care.

At Kelvin House Dental Practice, we are also a member of the ***Denplan Excel Accreditation Programme***

This brings you many benefits:

- Reassurance in your dentist - they are practising in line with current good practice
- Oral Health Score© - you will receive a regular oral health score from your dentist. This is a score out of 100 and will indicate how healthy your teeth and gums are
- Improved understanding - of the care and treatment available to you
- Motivating you - to maintain and improve your oral health
- More consultation - involvement in deciding your care and treatments
- Improved relationship - with your dentist through better communication and greater involvement in your own oral health
- Patient survey - you will have the chance to give your feedback on the care and service your practice provides. By joining the programme, we have committed to keep you well informed about your care and treatment. To help achieve this, a special range of Patient Information is available from us that explain different treatments and procedures, as well as giving advice on oral health.
